FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Full-stack developer with hands-on industry experience building production web applications across React, TypeScript, Node.js, and Prisma. Skilled in REST API design, authentication systems, database integration, and building responsive interfaces. Proven ability to independently learn new tech, resolve production bugs, and deliver scalable software solutions.

TECHNICAL SKILLS

- **Languages & Frontend:** JavaScript, TypeScript, React, Redux Toolkit, TanStack Query, Tailwind CSS, Vite
- **Backend & Databases:** Node.js, Express, PostgreSQL, MongoDB, Prisma ORM, DBeaver
- **Tools & Concepts:** Git, GitHub, Postman, Zod, JWT Authentication | Nepali, English, Hindi

PROFESSIONAL EXPERIENCE

Full Stack Developer — Himalaya Neo Tech (March 2026 – August 2026 | Lalitpur, Nepal)

<https://www.himalayaneotech.com/>

Restaurant Management System (RMS):

- Shipped 8 end-to-end frontend modules (shift management, order routing, customer management, inventory, refunds)
- Established a standardized service/hook/component architecture using TanStack Query for server state management and Zod for schema validation across the application.
- Implemented modular workflows for order processing, inventory tracking, and role-based kitchen routing.
- Identified and fixed backend logic errors in table-transfer capacity checks and order-reassignment workflows during testing.

Orbis ERP Platform:

- Built scalable frontend modules for an Enterprise Resource Planning (ERP) platform.
- Implemented General Ledger forms, account sub-group management, search, dynamic forms, pagination, and full CRUD workflows.
- Integrated components with backend REST APIs and verified endpoints using Postman.

Web Development Intern — Sriyog (2025 | Kathmandu, Nepal)

<https://www.sudarshansecurity.com.np/>

- **Sudarshan Security Website:** Built a fully responsive multi-page corporate web application (sudarshansecurity.com.np) from design to production using React, Vite, and Tailwind CSS.
- **Team Collaboration:** Worked with team to translate business requirements into clean, user-friendly interface designs tailored to brand guidelines.

Independent Full Stack Project Work — Self-Directed (2025 – Present)

JWT Authentication System:

- Built full authentication infrastructure from scratch using Node.js, Fastify, Prisma ORM, PostgreSQL, and Bcrypt. Features OTP verification, access/refresh token rotation, httpOnly cookie session handling, CORS, and CSRF/XSS protection.

EDUCATION

Bachelor of Information Technology (BIT)

Padmakanya Multiple Campus, Tribhuvan University (Mar 2023 – Present)

Relevant Coursework: Software Development, Web Technologies, Database Management, Software Engineering, Computer Networks, System Design.
